

## Baryte prints

### Silber Gelatine Barytvergrößerungen

Please read this **information!**

I edit all black / white negative formats from 8/11 mm / Minox to 8/10 inch / large format, and glass negatives; color negatives upon prior agreement and with a 100% surcharge. Details, gradation, surface and image tone will be considered according to your specifications (if possible bring a similar target image; digitally edited pictures can only be accepted on a non-binding basis). I process all available baryte papers. The different image tones can be influenced additionally by different developers (warm tone / cold tone). Surface treatment with „SISTAN“ (colorless image stabilizer from AGFA) is included in the price. Additional toning is with min. 40% surcharge, or billed at actual cost.

Lith prints are at least 60% surcharge. Images with margins will be calculated depending on time and effort. Custom-made mask frame is charged 25.00 € / frame.

Normal dodging or postexposure is included in the price. Masks will be charged depending on the cost and effort. Separate preliminary tests are billed at 10% of the final price (at least 20.00 €). This is charged when placing the order.

Of course, my baryte prints will be watered according to the requirements of museums and archives.

I should point out that it is not possible to work with millimeter precision when operating with baryte because of the material properties. Reasons for this encompass: paper run direction, wet expansion, shrinkage factor while drying, different paper thicknesses, etc. Exact cuttings from size 50/70 cm are billed at 10.00 €.

Retouching that goes beyond „normal“ spot prime, is billed at actual cost and effort, 24.00 € per 20 minutes. Images from size 90/120 cm require a surcharge of 10% of the Image price when using smooth dry „stretch“. Since experience shows that after a short time due to normal humidity images become wavy again, I recommend mounting them - starting from a size of about 50/60 cm.

**MOUNTING lamination:**

Wet Mounting on aluminum sandwich panels, hot lamination in thermal process with „RagMount“ on museum board, Alu sandwich panels, linen or solid aluminum.

**all pieces in €/piece**

ca. sheet size	Net
up to 13/18 cm	from € 41,50
18/24 cm	from € 47,00
