

Wet mounting on alusandwich board

Nasskaschierungen auf Aluminiumsandwichplatten

Please read this **information!**

I laminate baryte prints on a „Hylite“ special aluminum sandwich panel (about 1.2 mm thick, aluminum-polypropylene-aluminum).

The plate size is 150/300 cm. These sandwich panels are very light (less than 2.0 kg/m²), dimensionally stable, heat-resistant

(from - 30 to +120 ° C) and will not be wavy by exposure to humidity - unlike museum board. The wet Baryt paper is laminated on this sandwich panel with a special adhesive that is solvent free. The laminating process is reversible. After the drying process (takes approx. 24 hours, air drying) this method gives the Baryt paper a very beautiful shine, which is non-reflective and emphasizes the shadows. When doing the wet lamination it is not possible to work with millimeter precision due to the specific material properties of the Baryt paper (wet / dry stretch factor of up to 5%).

There is another possibility to laminate Baryt prints onto fine canvas. Due to the high workload the price is the same as for laminating on Alusandwich. Another possibility is the hot lamination process with „Unimount“ on various substrates up to a size of 90/120 cm.

The price depends on the substrate which is used. Please request a separate offer for hot laminations on solid aluminum panels (up to 3 mm) with sawn edge to hang frameless. When mounting the supplied prints no liability can be assumed for damaged prints.

This does not mean that I would not work with the utmost care.

As to pricing of the laminations: generally, the price is based on the overall amount of work required, so small sizes are comparatively expensive. With respect to different medium and large sizes, the resulting price is influenced by the amount of metal cut-off that incurs.

Moreover, I make exclusive use of high-quality materials that justify their price.

Upon request, I will provide the image completely framed.

A few important notes on framing:

Mat: museum quality, acid free, PAT tested.

Glass: Normal glass, Mirogard, white glass, UV passage.

Back: museum quality, acid free, aluminium sandwich.

Spacer bar: museum quality, acid free.

Frame: aluminum or wood.

Prices in €/piece

to 13/18 cm	€ 29,00
18/24 cm	€ 33,00
