

# 1 Black & White Film Developing

## Schwarz/Weiss Filmentwicklungen

english (as of 01/2021)

### Please read this information!

I develop negative formats from Minox 8/11 mm to 30/40 inch sheet film. All black/white films (not C-41 film) are developed individually. This means that in processing the films, both customer requests and film-specific needs are taken into account (push and hold). Since all films are developed individually, PUSH or HOLD development n +/- 1 step has **NO SURCHARGE!**

In order to provide an affordable alternative for individual films, I develop all small and medium format films at a single price on Wednesdays from 11:00 am from 7.22 € net or 8.60 € (incl. 19% VAT.) The developed films can usually be picked up Thursdays from 11:30. Orders with contact sheets will be available at an agreed upon time.

With few exceptions, all films are developed on a Jobo ATL in rotation using one-time chemistry. The advantage here is that all films are developed in fresh and unused chemicals, as opposed to automatic batch processing machines that work with recycled chemistry and which are quite limited in catering for specific requirements. The negatives are put in archival Polyethylen sleeves from PRINT-FILE.

#### Developers which are used:

**Tetenal Ultrafin:** soft-working, balancing development with beautiful grain image.

**Spur HRX 3 NEW:** 2 component developer, extremely sharp, very soft finish, Attention an ISO adjustment is required!! (+20% surcharge).

**Spur Speed Master:** One-time developer, extra for PUSHING, soft finish (+20% surcharge).

Other developers on request.

I also develop partially exposed 35 mm films: Bring your camera with the film loaded, I take out the exposed piece of film in the darkroom. The unexposed film remains in the cartridge and can continue to be used.

Quantity discounts apply to film development in the same format, the same developer and the same development time.

Contact sheets are made in a traditional analog method with an enlarger on silver-gelatine paper with a choice of RC paper or Fiber Base paper. Contact sheets are usually exposed with a 2 step gradation.

Overtime production is € 80.00 per hour.

PRICE in €/peice	1 pcs	> 2 pcs	> 5 pcs
<b>35mm film 12 - 36</b>	18,00 €	9,00 €	<b>7,22 €</b>
