

2 Fibre Base Silber Gelatine Prints Silber Gelatine Barytvergrößerungen

English (as of 01/2021)

Please read this INFORMATION!

I edit all black/white negative formats from 8x11 mm/ Minox to 8x10 inch/large format, and glass negatives; color negatives or chromogenic negatives (Ilford XP2, Kodak 400 CN usw) upon prior agreement and with a 100% surcharge. Details, gradation, surface and image tone will be considered according to your specifications (if possible bring a similar target image; digitally edited pictures can only be accepted on a non-binding basis). I process all available fiber based papers. The different image tones can be influenced additionally by different developers (warm tone/cold tone). Additional toning is with min. 50% surcharge, or billed at actual cost.

Images with margins will be calculated depending on time and effort. Custom-made mask frame is charged 25.00 € / frame.

Normal dodging or postexposure is included in the price. Masks will be charged depending on the cost and effort. Separate preliminary tests are billed at 10% of the final price (at least 20.00 €). This is charged when placing the order.

Of course, my fiber base prints will be watered according to the requirements of museums and archives.

Retouching that goes beyond „normal“ spot prime, is billed at actual cost and effort, 24.00 € per 20 minutes.

I should point out that it is not possible to work with millimeter precision when operating with fiber base because of the material properties. Reasons for this encompass: paper run direction, wet expansion, shrinkage factor while drying, different paper thicknesses, etc. Exact cuttings from size 50/70 cm are billed at 10.00 €.

Images from size 90/120 cm require a surcharge of 10% of the Image price when using smooth dry „stretch“. For all small format prints the standard price is 8.00 €. Since experience shows that after a short time due to normal humidity images become wavy again, I recommend mounting them - starting from a size of about 50/60 cm.

MOUNTING lamination:

Wet Mounting on aluminum sandwich panels, hot lamination in thermal process with „RagMount“ on museum board, Alu sandwich panels, linen or solid aluminum.

Overtime production costs 86.00 €/per hour plus 19% tax.

| ca. sheet size | all pieces in €/piece Net |
|------------------------|--------------------------------|
| up to 13/18 cm | from € 41,50 |
