To provide an affordable alternative for single film developing, I develop all 35mm and roll films every

WEDNESDAY FROM 11:00 AM AT A UNIT PRICE 8,60 € (including 19% VAT). The developed films can be picked up every Thursday from 11:00 am.

QUANTITY DISCOUNTS with identical developments: from 2 get - 50% off, from 5 pcs - 60%, from 50 - 65%

• • •

Please read this information!

I work with negative formats from 35 mm up to 8/10 inch sheet film. All Color films are developed individually. This means that in processing the films, both customer requests and film-specific needs are taken into account (push and hold).

All films are developed on a Jobo ATL in rotation using one shot development. The advantage here is that all films are developed in **fresh and unused chemicals**, as opposed to automatic batch processing machines that work with recycled chemistry and which are quite limited in catering for specific requirements.

Developers which are used:

Fuji Hunt Film X-Press Processing Kit C-41, as one Shot development

I also develop partially exposed 35 mm films: Bring your camera with the film loaded, I take out the exposed piece of film in the darkroom. The unexposed film remains in the cartridge and can continue to be used.

Quantity discounts apply to film development in the same format, the same developer and the same development time.

Overtime/urgent production is € 102,34 per hour.

All prices include 19% VAT.

FILM DEVELOPING incl. SCANNING

35mm film & 120mm medium format film
