Please read this information!

I work with negative formats from 35 mm up to 8/10 inch sheet film. All films are developed individually. This means that in processing the films, both customer requests and film-specific needs are taken into account (push and hold).

All films are developed on a Jobo ATL in rotation using one shot development. The advantage here is that all films are developed in fresh and unused chemicals, as opposed to automatic batch processing machines that work with recycled chemistry and which are quite limited in catering for specific requirements.

Developers which are used:
Fuji Hunt Film X-Press Processing Kit C-41, as one Shot development

Black and White films
Tetenal Ultrafin: (Listenpreis)
Kodak Xtol: auf Anfrage
Spur HRX3: +30% auf Anfrage

Overtime/urgent production is € 105,00 per hour.

All prices include 19% VAT.

B/W + C-41 FILM DEVELOPING incl. SCANNING

35mm film & 120er medium format film

The prices refer to the **SAME TIME ORDER** of film processing + scanning
